DETAILED ACTION

Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-3 disclose a portable phone with a flip 116 rotatable from an opened position to a closed position so as to cover an operable portion on the body including an open and closed bias force to bias the flip in an opened or closed position and rotated through a predetermined distance, the biasing means being provided in a hinge portion between the flip and the body, comprising a shaft with a first cam, and a bearing member with a second cam for coming into pressing contact with the first cam, which generates said biasing force to keep the flip biased in an opened or closed position when the first and second cams are rotated relative to each other, wherein a contact portion between the first and second cam is metallized. The prior art discloses a similar cam and hinge mechanism, however in the prior art the cam is not on the shaft, rather the shaft is a separate and unconnected item.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
